## CARTIER

Diamonds are forever, and that perhaps is why the **Panthère Lovée** watch set with a grand total of 923 diamonds will make for an exquisite addition to your trousseau. The silvered dial with sunray finish and encrusted with precious stones is an embodiment of sophistication. And what will surely catch your eye are the blue-steel sword-shaped hands – and the emerald in the eye of the brand's iconic panther.

## LAURENT FERRIER

A beautiful gradient of the shades of blue created by an invisible setting of baguette-cut diamonds and sapphires adorn the dial of this **Galet Secret Tourbillon Double Hairspring** watch. Pivot the dial's two opaque crystals like a fan and you will discover that underneath its attractive exterior lies a personalised, secret hand-decorated dial. The 42-mm white-gold casing of this engaging wristwatch encloses a manual winding movement with a power reserve of 80 hours. Ⓛ

## VAN CLEEF & ARPELS

The **Pâquerette** watch from the French company strikes the correct balance between high jewellery and excellence. An interplay of the shades of spring, this distinctive wrist adornment is a fine example of the brand's expertise. Here, sparkling pear-shaped diamonds come together with round yellow sapphires to depict the petals. And the dial is nestled delicately within the expanse of daisies.
