wearer to become a true citizen of the world, by being constantly being aware of how time runs on the rest of the Planet.

Meccaniche Veneziane introduces a travelers' favorite complication: the exclusive GMT function. GMT stands for "Greenwich Mean Time" and measures the current local time as well as at least one other time-zone. It allows you to be fully connected to different realities, by displaying an additional time zone on a 24-hour scale on the watch dial. This timepiece retains the brand's most distinctive peculiarities, introducing remarkable additional elements such as the renowned luxury movement ETA 2893-2.

The 42 millimeters case of the Meccaniche Veneziane Nereide GMT Dive Watch is made out of durable, beautiful 316L stainless steel making it easy to read. The diamond cut indices of these watches also have Swiss Superluminova coating which furthers its legibility, even in dark environments. It features a unidirectional, rotatable 120-minute graduated bezel to finish off the design, providing a perfect, aesthetically pleasing and functional finishing touch.

The gorgeous cases of the Meccaniche Veneziane Nereide GMT Dive Watch is protected by a domed sapphire crystal glass that works to repel impact damages, scratches and fading with time. The watch features fully decorated ETA 2893-2 movements that is able to keep the time with total accuracy and reliability. Each one of the Nereide GMT Dive Watches comes with a water resistance of up to 200 meters, making it a beautiful dive watch you'll never have to worry about... These watches feature luxurious handstitched Italian leather straps that are smooth and soft against the skin while offering the watch a regal appearance.

Meccaniche Veneziane has forayed into the Indian market through an exclusive marketing and distribution partnership with ExcedoLuxuria, the Ultra Luxury Brand Distributor and Retailer.
